

**Name:** Brooke Nickel

**Position & Affiliation:** NHMRC Emerging Leader Research Fellow

**Full Reference:** Brooke Nickel, Hankiz Dolan, Kirsten McCaffery, Nehmat Houssami, Erin Cvejic, Meagan Brennan, Jolyn Hersch, Melanie Dorrington, Angela Verde, Lisa Vaccaro. *Australian women's intentions and psychological outcomes related to breast density information.*

**Presentation Type:** Oral

*Dr Brooke Nickel presenting her findings demonstrating that women randomised to receive breast density information were more likely to seek supplemental screening, and were more anxious, worried about cancer and confused about their breast health in the Cancer Epidemiology session at the 2022 NSW Cancer Conference.*

### **How do you anticipate that the experience of presenting at the NSW Cancer Conference will benefit your research or professional development?**

Presenting a face-to-face oral at the NSW Cancer Conference has benefited my research and enhanced my professional development as it has allowed me to present to New South Wales and Australian-based researchers, and clinicians working in cancer and cancer consumers. This is important in terms of dissemination and impact, as well as building my track record. It has also enhanced my networking locally – an important aspect of building successful collaborations as an early career research. Network

The highlight of this conference was the face-to-face nature which has motivated me and made me excited about my research, and future collaborations and conferences!
