Me At the conference

- **How do you anticipate that the experience of presenting at the NSW Cancer Conference will benefit your research or professional development?**
Since many well-known people in the field of cancer were present in the conference, I could make some good links and talk to them. One of the people there suggested that we work together which was really exciting. There were some good talks in the field of cancer epidemiology which I really enjoyed and gave me lots of ideas for further research. I did not really benefit from the poster presentation part as my poster was not seen by many people and the posters were previously shortlisted based on the abstracts.
