

## NSW Cancer Conference 2022 Conference Report

**Name:** Tiffany Li

**Position & Affiliation:** PhD candidate, University of Sydney, Faculty of Medicine and Health

**Full Reference:** Tiffany Li, Hannah C. Timmins, Terry Trinh, Lisa G Horvath, Michelle Harrison, Peter Grimison, Matthew C. Kiernan, David Goldstein, Susanna B. Park. *Improvement of Chemotherapy-Induced Peripheral Neurotoxicity Over Time in Cancer Survivors*

**Presentation Type:** Oral presentation

*Me presenting my talk*

Thank you very much to Sydney Health Partners for sponsoring me to attend the 2022 NSW Cancer Conference. I was lucky enough to be chosen for an oral presentation on my studies investigation long-term outcomes in patients with chemotherapy-induced peripheral neurotoxicity. Being chosen to present among such an exceptional panel of speakers was truly humbling and I am very grateful to have been given such exposure.

After my presentation, I was approached by various experts in the field including Prof David Goldstein, Dr Joanna Fardell and Dr Ben Smith. They expressed interest in my studies and we discussed ideas on how I can move forward and further improve my analysis. I intend to keep in touch with these contacts and potentially work together in the future. This level of exposure and networking opportunity is very valuable to both my research and professional development.

A highlight of this conference was the consumer presentation by Lucy Jones. As researchers, we do not often have the opportunity to interact with consumers. Her talk was touching, emotional and powerful. As researchers, we sometimes get caught up in our little research hubs. It was very enlightening to see the bigger picture and be reminded of the overarching aims and power of cancer research. Moving forward, I aim to focus my research on translational impact and consciously consider how my findings can translate to benefitting cancer survivors' quality of life.

Thank you very much again for the opportunity to attend this conference.
