

NSW Cancer Conference 2022 Conference Report

Name: Jiali (Carrie) Huang

Position & Affiliation: PhD student, Centenary Institute

Full Reference: Jiali Carrie Huang, XinLin Linda Tong, MingChang Zhang, Michelle S. W. Xiang, Linxuan Jiang, Geoffrey W. McCaughan, Hui Emma Zhang, and Mark D. Gorrell. *Metabolic and Inflammatory Outcomes of DPP9 Depletion in Liver.*

Presentation Type: Poster

With meeting lots of researchers during the conference really inspired me to think about my future research directions.

- **Conference highlight(s) for you personally.** Cancer biology, immunology and immunotherapy presentations and the emerging cancer research methods workshop are very interesting to me. I intend to make contact with Dr Sj Sijie Shen from UNSW Sydney.
- **Key messages.** Gut microbiome and gut diseases is also something to look at for the future liver cancer therapy development.
