

NSW Cancer Conference 2022 Conference Report

Name: Tram Doan

Position & Affiliation: Bioinformatician, Translational Breast Cancer Genomic, WIMR

Full Reference: Tram Doan, Merridee Wouters, Jiashu Hu, Jennifer Koh, Erin Sykes, Clare Loudon, Peter Hains, Zainab Noor, Nirmala Pathmanathan, Qing Zhong, Phil Robinson, Roger Reddel, J Dinny Graham, Rosemary Balleine. *Immune activation in the proteomic landscape of Triple Negative Breast Cancer*.

Presentation Type: Poster

I found the conference to be well organised, very informative and engaging. It offered a broad spectrum of the current topics of interest in cancer research. I appreciated the opportunity to meet other researchers face to face and present and discuss our work. The conference highlights for me were Session 6 (Translational genomics and precision medicine) as well as Session 3 (Emerging Cancer Research Methods Workshop) as they closely align with my research interests. In addition, I particularly enjoyed the panel discussions because it was wonderful to hear the topic being discussed from multiple angles. As a data analyst, I found that the conference really helped to give me a broader perspective of all areas of cancer research, from basic biomedical and clinical research to psychological and public health.
