

# NSW Cancer Research Education

Enhancing HCC Surveillance: A Deep Dive into the Australian Clinical Practice Guidelines

Statewide Seminar Series 2023  
Tuesday 21 November, 12.30 - 1.30 pm

**A/Prof Eleonora Feletto**

Gastrointestinal Cancers Policy & Evaluation Stream Lead, The Daffodil Centre

**Prof Stuart Roberts**

Consultant Physician & Gastroenterologist, The Alfred Hospital

**Dr Joachim Worthington**

Research Fellow, The Daffodil Centre

**Amanda McAtamney**

Manager, Public Health Policy, Cancer Council Australia

**21** NOV |  **12:30 – 1:30** |  **Online Webinar**  
2023 PM PM

**REGISTER NOW**

The Research Capacity Building Grants are supported by Cancer Institute NSW

# Session Information

In this session discover the groundbreaking Clinical Practice Guidelines for Hepatocellular Carcinoma (HCC) surveillance in Australia. Developed alongside a diverse, multi-disciplinary team, these guidelines provide evidence-based recommendations to guide HCC surveillance for individuals at high risk. Don't miss this opportunity to delve into the world of HCC surveillance and its potential to impact on liver cancer outcomes in Australia.

## Speakers

**Associate Professor Eleonora Feletto** leads the Gastrointestinal Cancers Policy & Evaluation Stream at the Daffodil Centre, a joint venture between the University of Sydney and Cancer Council NSW. Her current work focuses on prevention and early detection of colorectal and liver cancer in Australia and overseas. She is currently working on major national and international projects assessing liver cancer control in the Western Pacific Region and in Australia. Her work seeks to identify gaps in liver cancer prevention, early detection and management and use evidence to guide policy and investment to improve liver cancer outcomes. These projects are part of collaborative efforts with the World Health Organisation, the Australian Government Department of Health and Aged Care & The Prevention Centre.

**Professor Stuart Roberts** is the Head of Hepatology at the Alfred Hospital, and former Chairperson of the GESA Clinical Research Network with Fellowships from GESA, AASLD and the AGA. He is clinical lead on the National HCC Clinical Quality Registry while his main research interests are hepatocellular carcinoma, viral hepatitis, autoimmune hepatitis, fatty liver disease, and non-invasive markers of liver disease.

**Dr Joachim Worthington** is a Research Fellow at the Daffodil Centre, with a focus on mathematical modelling. His current research is on using predictive modelling to estimate the potential impact of colorectal cancer and liver cancer screening and early detection in Australia, and using economic analysis to provide cost-effectiveness results for policy decision-making.

**Amanda McAtamney** is a health policy professional working as Manager of Public Health Policy at Cancer Council Australia. She has a Masters in Policy and Applied Social Research and a Bachelor of Arts (Sociology). Amanda's current portfolio of work focuses on the development and promotion of evidence-based cancer prevention, screening and early detection policy to the Australian Government and the wider community, and influencing the delivery of cancer control policy, research, treatment and care to reduce the impact of cancer in Australia.
